

User: How should I connect my CSS file (style.css) properly in the HTML so the styles load correctly?

Assistant: Use `<link rel='stylesheet' href='style.css'>` inside the `<head>` of your HTML.

User: I got a 404 Not Found error when trying to open my index.html in the browser from PyCharm. What steps should I take to fix this issue?

Assistant: Check if you're opening via `file:///` or `localhost:63342`, mark project as Resource Root, or run a simple server.

User: still the same error

Assistant: Verify exact browser URL, fix PyCharm config, or run ``python -m http.server`` to test locally.

User: how to add image in html and resize it?

Assistant: Use `` or CSS with width/height and keep aspect ratio.

User: What is the correct way to size the image (150x150px) and center it on the page using CSS?

Assistant: Set width/height in CSS, use `margin:auto` or flexbox to center.

User: had to generate an SSH key to connect GitHub, but I got warnings about file permissions

Assistant: Run `chmod 600` on private key, `chmod 700` on `~/.ssh`, then test with `ssh -T git@github.com`.

User: Git remote issues (remote origin already exists)...

Assistant: Your push worked; update remote with `git remote set-url origin git@github.com:sravya-Adapa/MP0.git`.

User: My GitHub Actions workflow failed to deploy.

Assistant: Check logs; common issues: permissions, wrong artifact path, missing pages: write, etc.

User: how do i get this chat as pdf?
